Microsoft Power Platform

Boost employee engagement and productivity

83%

The use of low-code platforms or apps is shown to have led to an 83% positive impact on work satisfaction.[1]

We help you leverage low-code tools to enhance the employee experience.

Connected internal and external data sources give your employees the information they need to act fast.

Improved communication and collaboration tools keep your teams in the flow of work.

Automation and streamlined applications simplify work in the back office and on the frontline.
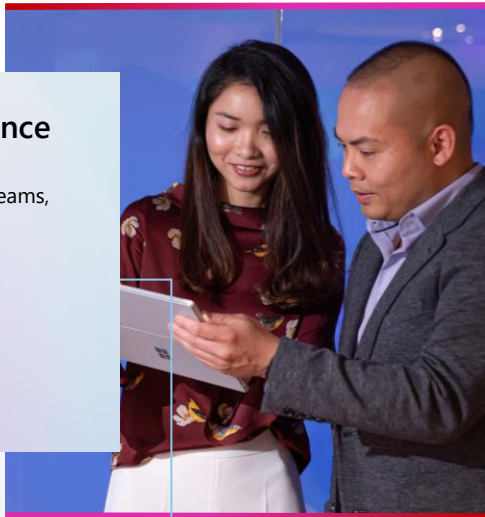

Connected employee experience

Natively integrate with Microsoft Teams, Microsoft 365, and Dynamics 365

Built in connectivity embeds apps directly in the flow of work

Robotic process automation for ultimate connectivity

Modernized processes

American Airlines uses Microsoft Power Apps to enhance collaboration amongst team members—connecting over
